# aluminum

Interlocking stacking pins fit securely into the base of the container on top, providing a stable self-supporting unit, whether filled or folded. Our containers can be stacked as high as a fork lift can reach. When considering weight loads, consider aluminum for its impressive strength-to-weight ratio.

Steel rusts, wood rots, corrugated is easily damaged. Aluminum requires virtually no maintenance and lasts for years. The structural integrity of aluminum makes our containers perfect for long-term outdoor storage. Low maintenance and infrequent replacement means high ROI.

Aluminum is lightweight which lowers shipping and handling costs. Three collapsed containers are approximately the same height as one upright container, saving valuable warehouse space, an asset in closed-loop shipping systems. Our containers can be collapsed in 20 - 30 seconds, no tools required.

LM Containers can be customized to meet your needs. We can design and fabricate to specified sizes or add features such as fold-down doors, removable panels, internal racks, casters, covers and optional stainless steel floor wear plates. We can build containers for any automated storage retrieval system or for any warehouse or shipping requirements.

Aluminum containers are fireproof, safe to handle, long-lasting, recyclable and repairable significantly reducing disposal, replacement and repair costs. Our containers can be customized at a much lower cost than competing materials. Collapsible aluminum containers are ideal for food, pharmaceutical, agricultural, petrochemical and automotive products.

# LMC Aluminum Pallets

*Shipping and Storage Solutions*

▶ **No bugs**    ▶ **No Splinters**    ▶ **No Disposal Costs**

*5 More Reasons to Use Aluminum:*

- 1 Durable** - Aluminum pallets are long lasting. They will not crack and split like wood, nor warp and sag like plastic. Components are welded for unparalleled performance against competing materials.
- 2 Hygienic** - Aluminum pallets are the perfect solution for industries where sanitation is required. LMC pallets are easily cleaned and will not rust or rot. They will withstand high pressure and high temperature cleaning methods.
- 3 Safe** - No injuries from splinters or nails. Aluminum pallets are fireproof and can withstand extremes in temperatures. No risk from toxic fumes. No wood-boring insect infestation.
- 4 Portable** - Our pallets are equipped with four-way entry and come in a variety of configurations such as solid deck and multiple stringer types. Aluminum pallets are light weight thus reducing workplace injury and shipping costs. They are ideal for automated storage and retrieval systems.
- 5 Custom Fabrication** - LM Containers can customize pallets to your exact specifications without the extraordinary expense of molds and tooling. We can offer much more than one-size-fits-all.
